

CASTLEGAR ROTARY CLUB
GLOBAL GRANT
WATER PROJECT PROPOSAL
2024-2025

EL PORVENIR,
SUPE DISTRICT, PERU

The community of El Porvenir installed their first water project in 2003

This system continues to function optimally, currently delivering potable water to approx. 2000 residents

The community has now grown considerably – the current population is close to 3000 inhabitants

This project will expand the existing water system and use solar power to pump additional water to an elevated reservoir, from where the water will flow to 265 new homes

The community will contribute hundreds of hours of labour to dig the trenches for the water pipes.

After chlorination, each of the 256 additional households in El Porvenir will be supplied with gravity-fed water to a faucet at the home

Les Ailes de L'Espérance – our Service Provider

Les Ailes de L'Espérance
Wings of Hope
Alas de Esperanza

This Montreal-based NGO has been working in Peru over the past 50 years.

They have completed several hundred water projects on the coast, in the Andes, and in the Amazon basin of Peru.

Since 2000, Les Ailes has installed approx. 30 water projects near Barranca, all of which are currently still functioning. Tens of thousands of people now have clean water.

All water projects are only undertaken if there is a local water committee composed of at least 50% women from the community.

All community members are given training on hygiene and the proper use of potable water.

The community will take ownership of the project by contributing many hours of unskilled labour toward the project and having a trained water committee.

Nuevo Huaralica - 2020

Previous Water Projects carried out by the Castlegar Rotary Club and District 5080 Clubs

Penico - 2021

Venturosa -2022

Nueva Esperanza - 2023

La Tablada – 2024
- in progress

San Felipito – 2025
- in progress

Location of previous water projects and the proposed El Porvenir project

Funding for the El Porvenir water project

The **Castlegar Rotary club** will be the **International Club**

The **Huacho Rotary club** will be the **Host Club**

Total cost: \$128,600.00 US

The Montreal Rotary Club will contribute 50% of total funds

The Castlegar Rotary Club is responsible for raising 50% of funds through cash contributions from our District clubs, matching DDF grants and matching grants from the Global Fund.

We are looking for clubs in our district to commit funds to this project. We need a commitment of approx. \$23,000 US, which, when combined with matching DDF and Global funds, will give us the required amount.

The Castlegar club will take on the responsibility for all grant writing, financial accounting and report writing.

Please join us in helping this needy community!!

We will be helping residents of El Porvenir obtain a desperately needed source of clean water.

This will help them avoid water-borne diseases and free them from the daily chore of finding adequate water, which currently must be collected from other distant areas of the community and transported to their homes.

El Porvenir says "Thank You!"
